

Venstar Displays Surveyor Cloud Energy Management System at ConnexFM National Conference

***Surveyor Cloud EMS improves facilities management, reduces energy usage and
cuts costs for multi-location businesses***

WEST HILLS, Calif., April 17, 2026 — [Venstar](#), a leading thermostat and energy management solutions provider, today announced it will display its [Surveyor®](#) Cloud Energy Management System (EMS) at the [ConnexFM National Conference](#) being held April 19–22, 2026 in Orlando, Fla. Venstar will be co-located with Daikin Comfort Technologies at booth Number 701.

Venstar’s technologically advanced HVAC controls and indoor comfort solutions are used in millions of multi-location businesses, small box retail and light commercial applications across the United States, Canada and Mexico.

“Rising energy costs can be a challenge to multi-location businesses, such as small-box retail and restaurant chains, typically one of the largest in-store operating costs,” said Steve Tudhope, Venstar’s senior vice president of Sales. “With Surveyor Cloud, users typically save 20–35 percent of their energy costs, which translates to saving tens of millions of dollars each year in addition to dramatic reductions in CO₂ emissions — all while providing a more comfortable environment, improving staff and customer well-being.”

Installed at 30,000+ locations throughout North America, Venstar’s Surveyor has proven successful in reducing energy costs at leading small-box retail and restaurant chains.

Surveyor Cloud Energy Management System

The next generation of Venstar’s award-winning Surveyor EMS, Surveyor Cloud is hosted in the cloud and features an enhanced user interface. Designed for multi-location businesses with anywhere from a few to thousands of locations, Surveyor Cloud gives facilities managers unprecedented visibility into their stores. They can quickly and easily see the status of the entire

chain in real time and remotely monitor, manage and control energy usage while reducing maintenance and facilities expenses.

Venstar will also display its Surveyor DC500 touchscreen interface with built-in Wi-Fi®, Bluetooth® and VenNet® radios, which is also compatible with Surveyor Series 400 systems.

Features include:

- Easy-to-use touchscreen interface
- Wi-Fi and Ethernet connectivity options
- Bluetooth for simple, user-friendly pairing of compatible devices
- VenNet radio for communication with new VenNet sensors
- Real-time, user-defined alerts and alarms
- Compatibility with Surveyor Series 400 systems

About Venstar

Venstar, founded in 1992 and based in Southern California, designs and builds a broad variety of innovative thermostats with more than 10 million installed. Venstar's Skyport Cloud service provides businesses with a secure, private, powerful cloud service for command and control of HVAC systems from anywhere in the world.

The company's Surveyor® Energy Management System allows retailers, restaurant chains and other multi-location businesses to remotely monitor, manage and control energy consumption while reducing maintenance expenses. Currently, Surveyor is used to control more than 100,000 HVAC systems and building lighting in more than 30,000 retail locations throughout North America.

Venstar is a wholly owned business unit of Daikin Comfort Technologies North America, Inc. (Daikin), a subsidiary of Daikin Industries, Ltd. (DIL), the largest manufacturer of HVAC systems worldwide.
