

## **Venstar to Display Award-Winning Surveyor Energy Management System and Connected Thermostats at 2019 Edison Electric Institute (EEI) Spring National Accounts Workshop**

CHATSWORTH, Calif., April 2, 2019 — [Venstar®](#), a leading thermostat and energy management systems supplier, today announced that its [Surveyor®](#) Energy Management System and family of connected thermostats with free [Skyport® Cloud Services](#) will be displayed at the upcoming [Edison Electric Institute](#) (EEI) [Spring National Key Accounts Workshop](#) being held April 7–10, 2019, at the Hyatt Regency in Seattle. Venstar will be at booth Number 207.

“The EEI workshop is a great opportunity to share with energy managers how our energy management solutions can help them reduce energy usage, gain remote control of their HVAC and lighting systems and potentially save their companies millions of dollars,” said Steve Dushane, president and CEO of Venstar.

Venstar’s Surveyor EMS has reduced energy costs by millions of dollars annually at more than 30,000 retail store locations in North America. Surveyor empowers small-box retailers and other multi-location businesses to remotely monitor, control and manage their HVAC, lighting/electrical and mechanical systems in all their stores, giving them unprecedented visibility into their energy usage. Designed specifically for small-box retail chains with hundreds to thousands of locations, Surveyor provides powerful energy management tools for energy and facility managers responsible for managing multi-location companies.

Venstar’s [ColorTouch®](#), [Explorer®](#) and [Explorer Mini connected](#) thermostats are Wi-Fi-enabled for remote monitoring and control using Venstar’s free [Skyport Cloud Services](#) and free mobile app. Most models are OpenADR certified, enabling users to participate in utility-generated events, as well as Title 24 certified, including Equipment Fault Detection Diagnostics (FDD). Select models also offer humidity control. They are also compatible with Venstar’s [Wireless Temperature Sensor](#) (Model ACC-TSENWIFI) to remotely measure air temperatures such as indoor, outdoor, return air or supply air. Venstar thermostats are compatible with virtually every available type of commercial heating and air conditioning system.

### **About Venstar Inc.**

[Venstar Inc.](#) is a leading thermostat and energy management system (EMS) manufacturer, known for providing value to its customers via ease of use and installation, proven cost savings, improved energy efficiency, quality and reliability. Founded in 1992, Venstar is one of the largest thermostat suppliers in the world and designs and produces Venstar-branded products as well as OEM thermostat products for the biggest names in HVAC. Venstar’s Surveyor is a leading energy management system, typically saving small-box retailers 20–35 percent of their energy costs, which translates to tens of millions of dollars in savings each year and dramatic

reductions in CO<sub>2</sub> emissions. Surveyor currently controls the energy usage of 30,000+ retail locations across the United States, Canada, Puerto Rico and Mexico.
