Venstar Adds Supply Air Alert Feature to ColorTouch Residential and Commercial Thermostats

Email Alerts Advise Users of Inadequate Heating or Cooling Temperatures

CHATSWORTH, Calif., Oct. 3, 2013 — [Venstar®](#), a leading thermostat and energy management systems supplier, today announced that it has added a new Supply Air Alert feature to its [ColorTouch®](#) residential (T5900) and commercial (T6900) thermostats.

The Supply Air Alert feature sends an email alert to the designated user when the supply air temperature (the air coming from the HVAC equipment) is not adequate. The user can set temperature thresholds for both heating and cooling.

“For users, receiving an alert saying that the supply air coming from the HVAC system is not within the set thresholds can be an early indication of equipment malfunction or failure,” said Steve Dushane, Venstar’s CEO. “The Supply Air Alert gives users an early heads up that equipment may need to be serviced, which helps avoid the equipment running inefficiently and unnecessarily increasing utility bills.”

This new update comes standard with new [ColorTouch residential and commercial thermostats](#) T5900 (residential) and T6900 (commercial) models. Previous ColorTouch models T5800 (residential) and T6800 (commercial) can be updated through Venstar’s [Skyport™](#) cloud services. In fact, anytime a new ColorTouch update is available, a notification will appear on the thermostat

screen along with simple prompts to help the user make the update.

Venstar also recently (6/13/13) [announced](#) its new Skyport firmware upgrade button, which allows users to remotely update the firmware for their ColorTouch thermostats anywhere in the world using the Skyport cloud services.

Venstar also offers a free ColorTouch mobile application, which allows users to remotely monitor and control their home or commercial thermostats. Compatible with Apple iPhone®, iPod®, iPad®, BlackBerry® and Android™ devices, the ColorTouch thermostat with Skyport Wi-Fi Key is priced under \$250 (estimated end-user cost).

About ColorTouch Residential Thermostat (Models T5800 and T5900)

The ColorTouch thermostat has won top awards for ease of programmability, its color touch screen and the ability to post up to 100 photos or graphics on the screen. Its multi-functional, simple-to-use, richly featured, programmable touch screen thermostat has customizable backgrounds, which may include the users' own photos as well as more than a dozen pre-set themes, including holiday themes. The ColorTouch residential model T5900 is now available with humidity control.

It also includes a free mobile app for Android, BlackBerry and iOS mobile devices, so contractors or homeowners can remotely access and control their ColorTouch thermostats via their Venstar Skyport Cloud online accounts. Compatible with virtually every type of heating and air conditioning system, ColorTouch can be configured to display one of three languages: English, French or Spanish. ColorTouch is the thermostat that thinks it's a digital picture frame!

Once a free Venstar Skyport Cloud account is created online, residential users can use Venstar's free mobile app on their Android, BlackBerry and iOS mobile devices or directly from the Web to:

- View a display of the current weather and weather forecast for all thermostat locations;
- Monitor thermostat information, including system run time and current energy usage;
- Change security settings, such as changing passwords or temperature setpoint limits;
- Program thermostat features, such as backlight dimming, holiday schedule, fan usage, supply air monitoring and much more;
- View incoming alerts based on pre-configured notifications, such as important updates on the health of the system or simply if the home's inside temperature has gone above or below pre-set limits; and
- Send text messages from a mobile device or desktop to the thermostat display, such as reminders and notes to family members.

About ColorTouch Commercial Thermostat (Models T6800 and T6900)

The award-winning ColorTouch programmable commercial thermostat is multi-functional, simple-to-use and richly featured. Its programmable scheduler keeps occupied periods comfortable while reducing energy use for unoccupied periods. Its color touch screen can be programmed to show company logos, ads and promotions as well as a picture gallery of up to 100 files to be used as a slideshow. ColorTouch was recently upgraded to add built-in humidity control. Compatible with virtually every type of commercial heating and air conditioning system, ColorTouch can be configured to display one of three languages: English, French or Spanish. The ColorTouch commercial model T6900 is now available with humidity control.

Once a free Venstar Skyport Cloud account is created online, commercial users can use Venstar's free mobile app on their Android, BlackBerry and iOS mobile devices or directly from the Web to:

- Instantly access up to 100 commercial locations;
- Easily monitor and control comfort settings at multiple buildings and office locations, including monitoring room temperature, supply air temperature, outdoor air temperature, run-time hours, and more;
- View incoming alerts via email on pre-configured notifications, such as important updates on the health of the system or simply if the inside temperature has gone above or below pre-set limits (Note: the servicing contractor may receive email alerts as well);
- Monitor thermostat information, including system run times and current usage, for each thermostat at all locations;
- View a display of the current weather and weather forecast for all thermostat locations;
- Schedule holidays for up to 365 days of each year, including reoccurring unoccupied days so that the thermostat can be set to "unoccupied" during those periods;
- Prevent unauthorized use by auto-screen lock or setpoint limiting; and
- Send text messages from a mobile device or desktop to the thermostat display, such as reminders and notes.
