Wireless Comfort Control You Can Place Anywhere. No Wires, No Drywall, No Compromise.

Explorer Portable eliminates the most common installation headaches contractors face: complex wiring, long wire runs, and costly drywall repair, saving time, labor, and margin with a The Explorer Portable wireless solution.

Contractor Benefit

- **Older Homes with Limited Wiring**

Add modern thermostat control without running new wire or dealing with costly drywall repair in finished spaces.

- **RTU's: Simplified Control Install**

Mount the base station at the equipment and finish the job in minutes. Short wire runs mean fewer man-hours and cleaner installs.

- **Works with 24V Zoning Systems**

Deliver multi-thermostat Room-by-room control using existing 24-volt zoning boards, without running new thermostat wire for each zone.

- **Fewer Callbacks, Better Performance**

Place control exactly where comfort is needed, improving system accuracy and reducing repeat visits.

Sell Smarter. Install Faster. Build Long-Term Customers.

Turn Every Install Into a Connected Customer.

Explorer Portable integrates with Venstar's Skyport Cloud giving contractors a powerful way to stay connected long after installation.

- Remote monitoring & control from anywhere
- Assign room names and manage multiple thermostats with ease
- Create simple room-by-room schedules for homeowners
- Reduce emergency calls with early visibility into system behavior
- Build long-term customer relationships through connected service
